THE TRIFLEX™ FABRIC ADVANTAGE

Our patented TriFlex™ fabric is engineered for invasive, minimal and non-invasive procedures. It provides targeted compression with consistent stretch on the skin's surface without compromising fit or comfort. It may improve skin laxity naturally and provide smoother results. With moisture wicking and cooling properties, combined with active silver antimicrobial protection, Marena Recovery garments help improve comfort, which leads to better compliance and outcomes.

Features and Benefits

Consistent, Targeted Compression
3D Stretch provides consistent, targeted compression that does not constrict or bind when stretched

Superior Stretch
Stretches up to 250% of the original length

Stretches up to 100% more than competitors

Silhouette Forming
Helps improve skin laxity and smooth out soft tissue inconsistencies for a more desirable appearance

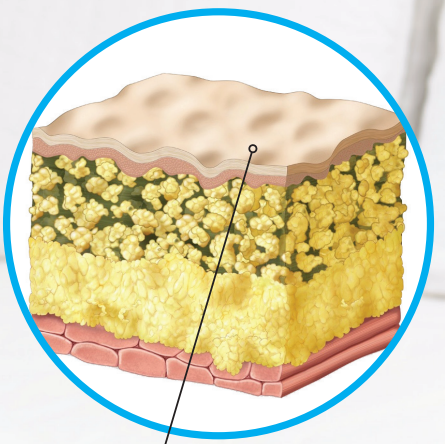
Antimicrobial Protection
Active silver antimicrobial protection helps neutralize odor causing bacteria

Cooling Properties
Improves comfort through moisture wicking and cooling

"Put simply, our patented fabric is like no other."

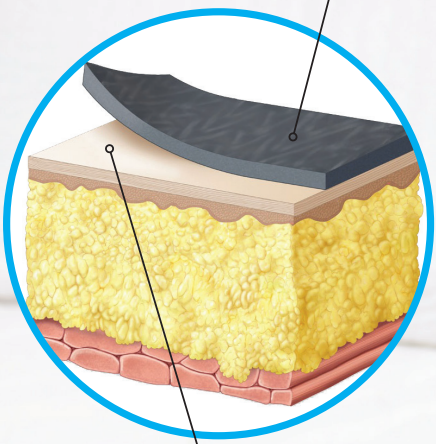
MARENA TRIFLEX™ TECHNOLOGY

WITHOUT COMPRESSION OR WITH POOR COMPRESSION



Rough, inconsistent, non-compressed or poorly compressed skin layer

WITH MARENA COMPRESSION



Smooth, consistent, compressed skin layer

BREAST SURGERY
Breast enlargement, reduction and reconstruction
